KAZI MUSHARRAF

AI Engineer & Full-Stack Developer

India | Remote roles & international consulting | USD / AED project discussions

kazimusharraf1234@gmail.com | github.com/mk-knight23

devtools.mkazi.live | LinkedIn profile

PROFILE

AI engineer and independent builder with a full-stack foundation and enterprise software experience. Builds AI agents, LLM applications, developer tools, automation and web products. Uses AI coding tools alongside implementation, testing and deployment workflows.

CORE STACK

TypeScript, JavaScript, Python, Java, SQL | React, Next.js, Node.js, Express | PostgreSQL, Supabase, SQLite, Prisma | Git, Docker, GitHub Actions, Vercel, Cloudflare | Codex, Claude Code, Cursor

PROFESSIONAL EXPERIENCE

Project Engineer - Wipro Technologies | July 2022 - July 2025

Enterprise application development in banking and fintech, including Citibank ICG and HSBC client assignments. Worked on full-stack web applications, backend systems, debugging, testing and production issue resolution.

Project Intern - Wipro Technologies | February - July 2022

Software engineering internship preceding the Project Engineer role.

Independent AI Engineer & Builder | Current focus

AI agents, LLM applications, developer tools and web products. Open to remote engineering roles and scoped consulting projects. See source repositories for implementation details and current limits.

SELECTED PUBLIC WORK

MK QuizFlow - Browser-based study application with document imports, quizzes and flashcards.

AI assistant workflows - Coding agent configurations, instructions, skills and workflow documentation.

AI SDK Anthropic - Python agent routing and SDK adapter experiments; README records current limits.

Portfolio time router - Specialist portfolio routing, stable biography and public discovery endpoints.

EDUCATION

B.Tech, Computer Science & Engineering | 2018 - 2022

M.S. Bidve Engineering College, Latur
